The charge is based on a percentage of the car's "price". "Price" for this purpose is the list price at the time the car was first registered plus the price of extras.

For cars first registered after 31 December 1997 the charge, based on the car's "price", is graduated according to the level of the car's approved CO₂ emissions.

Notes

1. The exact CO₂ emissions figure should be rounded down to the nearest 5 g/km for levels of 95g/km or more.
2. For all diesels add 3%, subject to maximum charge of 37%.

Car Fuel Benefits

For cars with an approved CO2 emission figure, the benefit is based on a flat amount of £22,600 (£22,200 for 2016/17). To calculate the amount of the benefit the percentage figure in the above car benefits table (that is from 7% to 37%) is multiplied by £22,600. The percentage figures allow for a diesel fuel surcharge. For example, in 2017/18 a petrol car emitting 132 g/km would give rise to a fuel benefit of 25% of £22,600 = £5,650.

§ On the death of a surviving spouse on or after 6 April 2017, their personal representatives may claim up to 100% of any residence nil rate band of the first spouse to die (regardless of their date of death, but subject to the tapered reduction).

∞ For all tax years the reduction is £1 for every £2 additional estate over £2,000,000. As a result, there is no residence nil rate band available in 2017/18 if the total estate exceeds £2,200,000 (£2,400,000 on second death if the full band is inherited).
